\*\*B-B This is the distance from the bottom of the sconce to the center of the electrical box.

\*ARM SPREAD For sconces with 2 or more arms. Other arm spreads can be specified. We have even fashioned asymmetrical arm spreads.

**SCONCES**

Standard finish on sconces is "old tin", a Deep Landing Workshop concocted recipe to emulate that "left in the barn too long" feel.

All sconces are UL listed.

Antique fiber candle covers are standard. Genuine bees wax candle covers are available for a small up charge. Keep in mind that you cannot use bulbs larger than 15 watts for fear of melting the wax.

Mirrored sconces come with silvered hand made glass mirrors. They have a great look.

Some of our sconces were designed to fit over 4" x 2 1/2" electrical boxes mounted vertically. Keep that in mind when ordering.

**FINISHES**

**CHANDELIER BASICS**

prices include

- 24" of hook for wooden chandeliers
- 36" of rod for metal chandeliers
- OR 24" of solid brass chain
- 24" of tin chain for cone chandeliers
- ceiling canopy and mounting hardware
- bulbs

Arm spread, when given, is for the arm spread shown in a particular photo. Arm spread is a highly variable feature on our chandeliers and can be changed, up to 36", at no additional charge.

**WOODEN CHANDELIER BASICS**

Our solid body chandeliers have wooden center spindles. The height column gives the height of the wooden spindle not including the ring and hook

Poplar wood painted to your specifications is standard. W/C in the height column means that the price given is for a walnut or cherry spindle.

Wooden chandeliers are not UL listed. For UL listed add 10%

**METAL CHANDELIER BASICS**

Standard finish is our "wrought-iron". See Finishes for a description.

The patented hook and ring does not come standard with these chandeliers, but is available at additional cost.

A halogen down light is available for many of these chandeliers

Metal chandeliers are UL listed.

**FINISHES - WOODEN CHANDELIERS**

Painted poplar spindle to your specification

"Wrought-iron" is standard on metal parts.

Old pewter is also available

Walnut or cherry spindle, add 30% of the base price.

Graining or marbling, add \$320 per tier  
 doesn't apply to larger chandeliers

**Faux Finishes**

Old iron, faux bronze, faux verdigris, faux rust are the most common. Variations and permutations are infinite.

Add 12% for faux finish on metal parts

Add 10% for faux finish on wood parts

Add 22% for faux everything

Gilding, 23k gold leaf, priced accordingly

Decorative carving priced accordingly

Decorative painting, priced accordingly

**FINISHES - METAL CHANDELIERS**

Standard finish is "wrought-iron", an oxidized lead tin alloy, antiqued to duplicate the look of old wrought-iron. No rust, no fuss, and no flat black.

Old pewter, same material as "wrought-iron" but looks exactly like antique pewter.

Faux finishes, add 25%

Copper verdigris, add 20%

**CUSTOM CHANDELIER FEATURES AND OPTIONS**

Additional arms on wooden chandeliers add \$200  
 except CH-400 & CH-401 add \$320

Arms can be squared with a twist, add \$80

Arm spread can be changed, up to 36", at no additional charge.

For every 2" over 36" of arm spread add \$5 per arm

The hanging rod for chandeliers can be made any length. Extra long lengths will be in sections.

each inch over 24" of squared rod, add \$1

each inch over 36" of round rod, add \$.50

every 6" of 8 ga. brass chain over 24" add \$24

each 4" link of tin chain over 24" add \$18

Wireless chain is no longer available

Wireless hook for metal chandeliers add \$300

Cathedral ceilings, add \$35

**Bobeche**

Add the amount shown for each bobeche

saucer \$0 plate \$16

pie \$0 bell \$36

crimped \$0 flower \$64

S-1 \$20 wood turned \$54

Balls, turned wood, on center of arms add \$20 each

Halogen down light, switched on chandelier for some metal chandeliers, notably the CH-1600 series, add \$400

**Custom Cut Out,**

usually for CH-1600 series, but can be added to any chandelier arm for that touch of class, starts at \$150

stock cut-out, add \$60

2 sided formed cut-out, add \$160

## UL LISTING

Most of our fixtures are UL listed for either dry or damp locations. Wall sconces and open top pendants are listed for dry locations, but can be wired for damp locations. We don't recommend this unless they will be well protected from direct weather.

Our halogen down light is currently not listed.

**PENDANTS AND  
 CEILING FIXTURES**

FIXTURE	HEIGHT	WIDTH	DESCRIPTION	LIST PRICE
CL-1				\$680.00

**STANDARD FINISHES FOR EXTERIOR FIXTURES**

light lead coat copper  
 dark lead coat copper  
 antique copper

Lead coat copper finishes become lighter over time in an exterior environment.  
 Antique copper becomes darker.

**STANDARD FINISHES FOR INTERIOR FIXTURES**

old tin (wall sconces and tin chandeliers)  
 light or dark lead coat copper (some wall sconces)  
 wrought iron or old pewter (l-100 series lanterns and metal chandeliers)  
 paint (on wood chandelier spindles)

**FINISH DESCRIPTIONS**

**WROUGHT IRON FINISH**

This is used primarily for interior fixtures. In reality this is a tin/lead alloy on copper or brass. We do the plating in house. Most round or square stock, such as chandelier arms and suspension rods are done this way. The L-100 series lanterns are also done this way, because we wanted to create a heavier wrought look, rather than the sheet iron or tin look. We use lead coat copper for the sheet iron look in exterior applications. We use a plated steel for our old tin interior applications.

The tin/lead alloy is oxidized and waxed to give the wrought iron look. And it won't rust.

Where structural strength is required, such as heavy iron mounting brackets for wall lanterns, steel is used, and finished using our faux iron. This is a textured oil paint finish. It is hand applied and built up. It stands up very well, even in a harsh exterior environment.

**OLD TIN**

For interior fixtures only. We use a plated steel that is aged (oxidized).

**OLD PEWTER**

For interior fixtures only. It loses its luster in exterior applications. We start with the same tin/alloy on copper or brass as the wrought iron, but finish it differently. Some of our interior sconces can be given an old pewter finish using lead coat copper. This is a darker gray due to the 100% lead content.

**LEAD COAT COPPER**

This is copper that has been hot dipped in molten lead. We buy this product in sheets, and use it to make our exterior fixtures, and some interior sconces. It has a more mottled appearance than the wrought iron finish. It can be finished as dark brown/black or light, with a grayer tone.

**FAUX IRON and other paint based textured finishes**

This is a finish that we use as standard on our steel exterior mounting brackets. It requires a 25% upcharge when used on the lanterns themselves, because the heavy texturing has to be applied carefully to keep it from interfering with the door or glass channels.

**OPTIONAL FINISHES**

Copper Verdigris - add 10%

Dark Copper Verdigris (also called Dark Antique Copper) - add 5%

Antique Brass (also called Old Brass) - add 15%

Polished Antique Brass - add 25%

Not recommended for exterior fixtures. In interior environments it will develop a golden tone over a period of 1-2 years.

unfinished satin copper, to go to weather - no up charge

unfinished satin brass, to go to weather - add 10%

painted to match your swatch - add 15%

Walnut or cherry for wood chandelier spindles (some size restrictions) - add 30%

Graining or marbling for wood chandelier spindles - add 20%

textured faux finish, iron, bronze, rust, or verdigris - add 25%

**HANGING CHANDELIERS AND LANTERNS**

O.A.H. means over all height, which is the distance from the ceiling to the bottom of the fixture.

As most of our fixtures hang from fixed stems, O.A.H. needs to be provided before delivery.

For fixed stem hung fixtures we also need to know if there is a cathedral ceiling, and if so the approximate slope of the ceiling.

Chandeliers over a table should be 30" to 34" above the table top. This can be moved up when hanging from very high ceilings.

Hanging fixtures requiring head room should be no lower than 6' 6" above the floor. Note: if there are oversized doors that might swing into the fixture.

Deep Landing Workshop supplies the hardware, including canopy and crossbar, required to mount to a standard electrical box.

Our "wireless" hook requires a rigid suspension rod. If it's exposed to wind, there will be work hardening and ultimately it will fail.

## **SCONCES**

When considering our sconces, measure the electrical box where you intend to place them. Many of our sconces were designed when the standard electrical box for sconces was 4" x 2 1/2" mounted vertically. Life is not so simple anymore, and if the sconce doesn't cover the electrical box, we can supply you with a thin metal cover plate that can be painted to match the wall.

## **GLASS**

### **STANDARD GLASS**

We use restoration glass as standard. It is hand made. Sometimes it will be a European import and sometimes it is made in West Virginia by Blenko.

Being hand made, its characteristics will vary, from subtle imperfections to a more pronounced waviness. There are some bubbles, but not nearly as many as in a manufactured seedy glass.

## **SHIPPING**

**ALL SHIPPING IS FOB CHESTERTOWN MARYLAND**

### **UPS OR FED EX GROUND**

If a chandelier's arm spread is less than 28", with a few exceptions, it will ship UPS. Otherwise it must go freight. Shipping charges vary and will be quoted with an order confirmation..

### **FREIGHT SHIPMENTS**

There will be a 5% of list price packaging charge to box a fixture on a pallet. Crating charges for overseas shipments are 10% of list. We ship freight prepaid and invoice the charges.

### **SHIPPING GLASS FIXTURES**

Due to the shippers propensity for breaking our hand made glass, we are shipping the glass for our larger lanterns uninstalled in the lanterns.

### **BLANKET DELIVERY**

We deliver ...

within 50 miles \$90

within 100 miles \$180

\$1.80 per mile above 100 miles within 300 miles
