**PROJECTS OF NOTE**

**ST ANDREWS SCHOOL** MIDDLETOWN, DELAWARE

**2009**

In the existing gym the entrance was renovated. In conjunction with Jonathan Krumrine of Voith & Mactavish Architects we designed and fabricated this chandelier to compliment existing fixtures that are ubiquitous around the campus. It is 4 ½ feet in diameter and 4 feet high. We used custom bend frosted and seedy glass. There are removable plexiglass diffusers in the bottom for relamping.

We made the sconces on either side of the entrance to compliment the chandelier.

## PROJECTS OF NOTE

**2011**

Again, in conjunction with Jonathan Krumrine of Voith & Mactavish Architects we designed and created these contemporary fixtures to compliment the design of the new gym. It is 48" in diameter and 23" high. It has 20 medium lamp holders. The lens for both the inside and outside of the ring uses 20 overlapping pieces of bent frosted glass. The bottom has 20 pieces of overlapping frosted glass.

**PENN CHARTER SCHOOL** PHILADELPHIA, PENNSYLVANIA

## PROJECTS OF NOTE

**2010**

This was designed in conjunction with Robert Piasecki of Voith & Mactavish Architects. It is 48" in diameter and 53" high. It has 12 medium lamp holders. It is fitted with frosted acrylic cylinder shades.

**REESE RESIDENCE** CENTERVILLE DELAWARE

**2010**

We used the same suspension system we used on the Penn Charter chandeliers, but created a more traditional lamp holder. It is 48" in diameter and 54" high. It has 12 candelabra lamp holders.

## **PROJECTS OF NOTE**

### **INN AT MONTCHANIN VILLAGE MONTCHANIN, DELAWARE**

#### **2000**

The Inn at Montchanin Village restored a barn on the property and with additions converted it to a reception area for the inn. The owners, Dan & Missy Lickle asked if we could do an 8 foot diameter chandelier to fit the space. Who can say no to the Lickles.

The result is 96" in diameter and is 78" high. It has 48 arms on 3 tiers and is mighty impressive to stand under.

**LAWRENCEVILLE SCHOOL**  
**ABBOTT DINING HALL**  
LAWRENCEVILLE, NJ

**2018**

Working with Daniela Voith and Sennah Loftus of Voith & Mactavish Architects we provided the 10 large chandeliers for the renovated dining hall. We also did pendants for adjoining dining rooms and alcoves. We rounded it out with some exterior sconces and a large pendant for the cupola.

A 62" high pendant for the cupola.

**PRESBYTERIAN CHURCH OF CHESTERTOWN** CHESTERTOWN, MARYLAND

**2007**

I don't know what to say about this job, but if you are sitting in the sanctuary, and the lights are on, it can be profound. I would say spiritual, but I don't want to invite calamity.

There are 25 of these, 36" high and 13 1/2" square.

We did wall sconces to compliment.

**GOLF CLUBS WE HAVE KNOWN**  
**MERION GOLF CLUB** ARDMORE PENNSYLVANIA

**2014**

Working with Blackney Hayes Architects and the Merion Golf Club building committee, we designed and made six of these for the new clubhouse pavilion. They are 64" high, 76" diameter with 15 lights.

**GOLF CLUBS WE HAVE KNOWN**  
**PATTERSON CLUB FAIRFIELD, CONNETICUT**

**2009**

We worked with Mark Finlay Architects on this project. We did (14) 29" high pendants (L-1260B) and (13) 21" bracket hung lanterns (L-1260-LB10), plus smaller fixtures.

**L-1260B-H**

30 1/2" high including 3 1/2" ring, 16" square.

4 medium sockets, 75 watt max each

36 1/2" overall height including the 1 1/2" finial.  
 Lantern body is 25 1/2" high with finial and 14" square.  
 Wall plate is 31" high and 6" wide, projects 16 1/4", Center of j-box is 4" above the bottom of the lantern body. It is centered on the back plate but can be moved to suit.  
 4 medium sockets 75 watt max each.
